4. General impression

4.1) What I really liked about the course:

It provides us with useful words and thermilogy which are very usefull for our career, the topics are interesting.

The method that teacher uses is good, read and discuss. The presentations of, different students are fun...

The methods which were provided by teacher are really alternative. Some of them are really interesting and easy to understand.

good atmosphere

Helps to speek and improve language continous

I like the content of the class & Mr Ohara is very friendly & easy going.

all homework has similar topic,

4.2) What I did not like about the course:

One of the best things that you can do in order to improve your language skills is speaking.

Sometimes the pace of the course is a little bit too slow.

The Some of the meterials is not so connected with the newest technology. I think we can learn some thing about latest developments.

not many discussion between students

- no interaction between students

more reading than discussion

4.3) Suggestions:

Discussions, debates, workshops in group, everything that gives students the oportunity to speak at english and not only listen

I hope the course could be a little ~~bit~~ more faster.

The pace of the course can be a little bit faster.

more interactive tasks

→ more ~~tasks~~ speaking tasks between students

Maybe we can discuss some really new tech in class.
